```
1 What will be the output of the following code snippet?
 def func(a, b):
   return b if a == 0 else func(b % a, a)
 print(func(30, 75))
     a) 10
     b) 20
     c) 15
     d) 0
Ans;- c)15
 2 numbers = (4, 7, 19, 2, 89, 45, 72, 22)
 sorted\_numbers = sorted(numbers)
 even = lambda a: a % 2 == 0
 even_numbers = filter(even, sorted_numbers)
 print(type(even_numbers))
     a) Int
     b) Filter
     c) List
     d) Tuple
Ans;- b)Filter
 3) As what datatype are the *args stored, when passed into
 a) Tuple
 b) List
 c) Dictionary
 d) none
Ans:- d)none
 4) set1 = \{14, 3, 55\}
 set2 = \{82, 49, 62\}
```

set3={99,22,17}

print(len(set1 + set2 + set3))a) 105 b) 270 c) 0 d) Error Ans:- d)Error 5) What keyword is used in Python to raise exceptions? a) raise b) try c) goto d) except Ans:- a)raise 6) Which of the following modules need to be imported to handle date time computations in Python? a) timedate b) date c) datetime d) time+ Ans:- c)datetime 7) What will be the output of the following code snippet? print(4**3 + (7 + 5)**(1 + 1))a) 248 b) 169 c) 208 d) 233 Ans:- c)208 8) Which of the following functions converts date to corresponding time in Python? a) strptime b) strftime c) both a) and b) d) None

Ans:- a)strptime

a) mutable b)immutable c)unchangeable d) none Ans:-b)immutable 10) Theis a built-in function that returns a range object that consists series of integer numbers, which we can iterate using a for loop. A. range() B. set() C. dictionary{} D. None of the mentioned above Ans:-A) range() Question 11 Amongst which of the following is a function which does not have any name? A. Del function B. Show function C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above	
b)immutable c)unchangeable d) none Ans:- b)immutable 10) The is a built-in function that returns a range object that consists series of integer numbers, which we can iterate using a for loop. A. range() B. set() C. dictionary{} D. None of the mentioned above Ans:- A) range() Question 11 Amongst which of the following is a function which does not have any name? A. Del function B. Show function C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	9) The python tuple isin nature.
c)unchangeable d) none Ans:- b)immutable 10) Theis a built-in function that returns a range object that consists series of integer numbers, which we can iterate using a for loop. A. range() B. set() C. dictionary{} D. None of the mentioned above Ans:- A) range() Question 11 Amongst which of the following is a function which does not have any name? A. Del function B. Show function C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Scrializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	a) mutable
d) none Ans:- b)immutable 10) Theis a built-in function that returns a range object that consists series of integer numbers, which we can iterate using a for loop. A. range() B. set() C. dictionary{} D. None of the mentioned above Ans:- A) range() Question 11 Amongst which of the following is a function which does not have any name? A. Del function B. Show function C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-scrializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	b)immutable
Ans:- b)immutable Theis a built-in function that returns a range object that consists series of integer numbers, which we can iterate using a for loop. A. range() B. set() C. dictionary{} D. None of the mentioned above Ans:- A) range() Question 11 Amongst which of the following is a function which does not have any name? A. Del function B. Show function C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-scrializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	c)unchangeable
The is a built-in function that returns a range object that consists series of integer numbers, which we can iterate using a for loop. A. range() B. set() C. dictionary{} D. None of the mentioned above Ans:- A) range() Question 11 Amongst which of the following is a function which does not have any name? A. Del function B. Show function C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	d) none
Theis a built-in function that returns a range object that consists series of integer numbers, which we can iterate using a for loop. A. range() B. set() C. dictionary{} D. None of the mentioned above Ans:- A) range() Question 11 Amongst which of the following is a function which does not have any name? A. Del function B. Show function C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	Ans:- b)immutable
Theis a built-in function that returns a range object that consists series of integer numbers, which we can iterate using a for loop. A. range() B. set() C. dictionary{} D. None of the mentioned above Ans:- A) range() Question 11 Amongst which of the following is a function which does not have any name? A. Del function B. Show function C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	10)
we can iterate using a for loop. A. range() B. set() C. dictionary{} D. None of the mentioned above Ans:-A) range() Question 11 Amongst which of the following is a function which does not have any name? A. Del function B. Show function C. Lambda function D. None of the mentioned above Ans:-d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:-Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	10)
B. set() C. dictionary{} D. None of the mentioned above Ans:- A) range() Question 11 Amongst which of the following is a function which does not have any name? A. Del function B. Show function C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	· · · · · · · · · · · · · · · · · · ·
C. dictionary{} D. None of the mentioned above Ans:- A) range() Question 11 Amongst which of the following is a function which does not have any name? A. Del function B. Show function C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	A. range()
D. None of the mentioned above Ans:- A) range() Question 11 Amongst which of the following is a function which does not have any name? A. Del function B. Show function C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	
Question 11 Amongst which of the following is a function which does not have any name? A. Del function B. Show function C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	
Question 11 Amongst which of the following is a function which does not have any name? A. Del function B. Show function C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	
Amongst which of the following is a function which does not have any name? A. Del function B. Show function C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	Ans:- A) range()
Amongst which of the following is a function which does not have any name? A. Del function B. Show function C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	
A. Del function B. Show function C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	Question 11
B. Show function C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	Amongst which of the following is a function which does not have any name?
C. Lambda function D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	A. Del function
D. None of the mentioned above Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	
Ans:- d)None of the mentioned above Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	
Question 12 The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	
The module Pickle is used to A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	Ans:- d)None of the mentioned above
 A. Serializing Python object structure B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method 	Question 12
 B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method 	The module Pickle is used to
 B. De-serializing Python object structure C. Both A and B D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method 	A. Serializing Python object structure
D. None of the mentioned above Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	B. De-serializing Python object structure
Ans:- Both A and B Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	
Question 13 Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	D. None of the mentioned above
Amongst which of the following is / are the method of convert Python objects for writing data in a binary file? A. set() method	Ans:- Both A and B
a binary file? A. set() method	Question 13
"	
	"

Ans:-C)load() method

C. load() method

D. None of the mentioned above

14 .Amongst which of the following is / are the method used to unpickling data from a binary file?
A. load()B. set() methodC. dump() methodD. None of the mentioned above
Ans:- A) load()
15.
A text file contains only textual information consisting of
A. AlphabetsB. NumbersC. Special symbolsD. All of the mentioned above
Ans:- D. All of the mentioned above
16
Which Python code could replace the ellipsis () below to get the following output? (Select all that apply.)
captains = {
"Enterprise": "Picard",
"Voyager": "Janeway",
"Defiant": "Sisko",
}
Enterprise Picard,
Voyager Janeway
Defiant Sisko
a) for ship, captain in captains.items():
print(ship, captain)
b) for ship in captains:
<pre>print(ship, captains[ship])</pre>
c) for ship in captains:

```
print(ship, captains)
             d) both a and b
Ans:- d) both a and b
 17)
 Which of the following lines of code will create an empty dictionary named captains?
     a) captains = \{dict\}
     b) type(captains)
     c) captains.dict()
     d) captains = \{\}
Ans:- d)captains={}
 18) Now you have your empty dictionary named captains. It's time to add some data!
 Specifically, you want to add the key-value pairs "Enterprise": "Picard", "Voyager": "Janeway",
 and "Defiant": "Sisko".
 Which of the following code snippets will successfully add these key-value pairs to the
 existing captains dictionary?
     a) captains{"Enterprise" = "Picard"}
     captains{"Voyager" = "Janeway"}
     captains{"Defiant" = "Sisko"}
     b) captains["Enterprise"] = "Picard"
     captains["Voyager"] = "Janeway"
     captains["Defiant"] = "Sisko"
```

```
d) None of the above
```

}

c) captains = {

"Enterprise": "Picard",

"Voyager": "Janeway",

"Defiant": "Sisko",

```
Ans:- b)

captains["Enterprise"]="Picard"

captains["Voyager"] = "Janeway"

captains["Defiant"] = "Sisko"
```

19) You're really building out the Federation Starfleet now! Here's what you have: $captains = {$ "Enterprise": "Picard", "Voyager": "Janeway", "Defiant": "Sisko", "Discovery": "unknown", Now, say you want to display the ship and captain names contained in the dictionary, but you also want to provide some additional context. How could you do it? a) for item in captains.items(): print(f"The [ship] is captained by [captain].") b) for ship, captain in captains.items(): print(f"The {ship} is captained by {captain}.") c) for captain, ship in captains.items(): print(f"The {ship} is captained by {captain}.") d) All are correct Ans:- b) for ship, captain in captains.items(): print(f"The {ship} is captained by {captain}.") 20) You've created a dictionary, added data, checked for the existence of keys, and iterated over it with a for loop. Now you're ready to delete a key from this dictionary: captains = {

"Enterprise": "Picard",

"Voyager": "Janeway",

"Discovery": "unknown",

"Defiant": "Sisko",

}

What statement will remove the entry for the key "Discovery"?

- a) del captainsb) captains.remove()
- c) del captains["Discovery"]d) captains["Discovery"].pop()

Ans:- c) del captains ["Discovery"]
